

Rekha Kumari

Front End Engineer

📞 +91-7888394974 ✉ rekhakumari44400@gmail.com 📍 Hyderabad, India 📅 4 Years of experience

Results-driven Frontend Engineer with 4.5 years of experience building high-performance, accessible web applications using React, Next.js, TypeScript and JavaScript. Demonstrated success in architecting portable component systems, improving Core Web Vitals and establishing engineering standards such as Husky Git hooks and accessibility audits to accelerate feature delivery. Strong background in test-driven development, performance optimization and collaborative product delivery, with a track record of measurable improvements in performance, test coverage and reliability.

KEY SKILLS

✓ React.js ✓ Next.js ✓ TypeScript ✓ Javascript ✓ HTML and CSS ✓ Tailwind CSS ✓ Git & GitHub ✓ Jest ✓ Vitest
✓ Web Accessibility (WCAG) ✓ Web Performance Optimization ✓ Socket.io ✓ Node.js ✓ Redux ✓ Zustand ✓ Ci/Cd

WORK EXPERIENCE

Front End Engineer

Mar 2025 - Present

Technogise

- Architected and integrated a responsive subscription interface using *Next.js/React*, establishing a scalable dark-theme system with data-theme attribute selectors that achieved zero visual regression.
- Improved page load time by 46% by eliminating redundant API calls, deferring non-critical data fetching, and optimizing frontend rendering.
- Established automated code quality gates using Husky Git hooks for pre-commit/pre-push linting and formatting, successfully reducing CI pipeline failures caused by local quality issues.
- Participated in on-call rotations, handling production incidents with an average first response time of under 5 minutes, ensuring high system reliability and minimal downtime.

Software Engineer

Nov 2022 - Nov 2024

Simplr Software India

- Led the Web Accessibility Initiative, achieving a 10% improvement in axe-core scores and ensuring compliance with accessibility standards through continuous stakeholder collaboration.
- Strengthened codebase integrity by achieving 90% test coverage, reducing code duplication by 12% and code smells by 48%.
- Optimized application performance by implementing lazy loading, reducing the initial render bundle size by 7.6% and enhancing the user experience.

Frontend Web Developer

Jul 2021 - Nov 2022

Medly Pharmacy

- Delivered 8+ customer-facing features from design handoff to production, ensuring on-time releases and alignment with business and user requirements.
- Cut rework by 25% by instituting rigorous code reviews and test-driven development practices, increasing sprint velocity and capacity for new feature development.

PROJECTS

Sketchbook Web Application

1 Weeks

- Spearheaded the end-to-end development of the Sketchbook Web Application, from concept to successful launch, boosting user engagement with an intuitive and user-friendly interface.
- Engineered real-time collaboration features, enabling multiple users to work concurrently and enhancing team productivity.
- Developed customizable tools for brush size and color, significantly improving the artistic flexibility and overall user experience.
- Integrated JPEG export functionality, allowing users to easily download and share their artwork.

AI Task management application

1 Weeks

- Designed and developed an AI-powered Task Management Application by integrating Google Gemini API with serverless functions to automate user story generation from task descriptions, enhancing project workflow efficiency.
- Implemented a dynamic rich-text editor using ReactQuill with live preview functionality, significantly improving content creation accuracy and user experience.

EDUCATION

B.C.A. | Computer Applications (General)

2020

Guru Nanak Dev University (GNDU)
